

Focus and Scope:

Research in Graph Theory (acronym title: *RGT*; abbreviated title: *Res. Graph Th.*; title in Russian: *Исследования в теории графов*; title in Ukrainian: *Дослідження в теорії графів*) is an archival electronic scientific journal aimed for publishing in open access original articles along with supplementary materials produced within the research project of Artem Potebnia in the field of graph theory. The primary topics covered by the project include: structural results about graphs, hypergraphs and complex networks; graph algorithms and their complexity; combinatorial optimization problems in graph theory. The interaction of graph theory with related fields of computer and mathematical science also belongs to the scope of the project. The main objective of this journal is to expand the readership of the project and facilitate the discussion of its results. The languages of publications in RGT are English, Russian and Ukrainian.

Publication Model:

RGT follows the continuous model of publication, thereby, permitting the immediate availability of new materials to readers. All papers available in the journal are assigned unique article numbers, which allows their identification. Moreover, RGT provides its publications with PURL identifiers. These identifiers are intended to remain resolvable even in the case of change in the actual web address of the linked materials.

Interaction with Readers:

This publishing system contains a number of original modules developed to simplify the experience of readers working with the presented materials. The available features include: automatic formation of the citation data in a number of different formats; printing of materials or their abstracts; viewing of articles in Google Scholar; sharing of articles in social networks; advanced search within all published materials with several filtering options. Apart from that, any reader can participate in the discussion of the published materials by using the article commenting function. The registration at RGT provides a reader with additional functions such as subscription to the journal and ability to modify posted comments as well as bind extended personal data to them. Notice that RGT is not responsible for the content of comments left by its readers.

Publisher of RGT:

RGT is published starting from November, 2020 by Artem Potebnia, Individual Entrepreneur. The publisher is located in Korosten, Zhytomyrska Region, Ukraine.

Contact with RGT:

Readers interested in further discussion of articles published in RGT or modules of its publishing system should address their correspondence to the e-mail address administrator@artem.pp.ua.
